"When you reach for the stars, you are reaching for the farthest thing out there. When you reach deep into yourself, it is the same thing, but in the opposite direction. If you reach in both directions, you will have spanned the universe."

- Vera Nazarian

CONTENTS

Mission	To promote oral health, foster through a comprehensive online initiative and become a hotspot for dentists and public.

EDITORIAL

Dr Nupur Shrirao

She is a consultant Prosthodontist and esthetic dentist. She is currently in the Editorial Committee of 'International Journal Of Innovative Research In Dental Sciences (IJIRDS)' and the Reviewer Board of 'Journal of International Oral Health (JIOH)' and 'IP Annals of Prosthodontics & Restorative Dentistry (APRD).'

Our world is riddled with confusion, doubts and insecurities because it involves a lot of 'maybes'. We are uncertain and unsure. We keep pondering over what can this possibly be or what can that perhaps mean.

The only way for peace is a life without maybes; the only way to get rid of maybes is to simply do a fact check! Once you get your facts right, once you build your work on a foundation of solid, researched and studied evidence, it just leaves no room for doubt.

APRIL 2019 – ORAL CANCER AWARENESS MONTH

**Dr Harshal Patil, Master of Dental
Surgery in Periodontics and
Implantology from Kandivali, East
Mumbai.**

April is oral cancer awareness month worldwide. To highlight this, here are some oral cancer knowledge updates. Dentists are the only medical faculty to diagnose oral cancers initially than others during routine mouth check-up. That's why visiting a dentist is mandatory.

PROBIOTICS IN CHILDREN – A PEDIATRIC DENTIST’S OVERVIEW

Dr Archana Singh, Postgraduate Trainee in Pedodontics and Preventive Dentistry. She is a passionate writer and music lover.

Probiotics including living microbes beneficially affect the health of the host. It is abundantly available in yogurt and other dairy products. According to the International Scientific Association, Probiotics and Prebiotics are defined as “Live microorganisms, which when administered in adequate amounts, confer a beneficial effect on the health of the host.”

PREDICTABLY ACHIEVING ESTHETICS

Dr Zainab A Rangwala has been practising for 3 years after her graduation from Jamnagar. She is an avid reader and a passionate writer.

Long gone are days when the results of cosmetic dentistry were unpredictable and stressful. By using a proper systematic approach to treatment planning, one can eliminate guesswork and achieve a predictable aesthetic makeover. Smile enhancement is the forefront of treatment planning in the present era of dentistry.

OZONE IN DENTISTRY - A PARADIGM SHIFT

**Dr Manpreet Kaur, Department of
Prosthodontics, Maharaja Ganga
Singh Dental College and Research
Centre Sriganganagar, Rajasthan.**

Today we are suffering from
one problem or another
repeatedly. Given this situation,
how would it sound if someone
says that one can cure any
health hazard by using some
home ingredients after
following some small
procedures?

Wouldn't
it be great? This article
will elaborate on how to
prepare a one stop solution
for your problems.

AGING & IT'S EFFECTS ON TEETH

Dr Nikhat Gazge is an Oral Physician & Maxillofacial Radiologist. She has been practising in the dental industry for several years.

Ageing is a normal, genetically dictated physiological process. Sixty-five years was selected as the dividing line between middle-aged and elderly individuals by Germany in 1880s & United States in 1900s; people above 65 are termed as geriatric. Any citizen above 60 is considered as a 'Senior Citizen' or 'Elderly' in India.

DENTISTS AS ENTREPRENEURS

**Dr Rajashree, BDS and PG Certificate
Course in Implants, Bioner, Spain.**

Dentists offer the finest dental care, but it's entrepreneurship that motivates them to make a difference in the world. Practicing dentistry and building a successful business helps expand dentists in diverse areas of their life. Entrepreneurship comes at great financial risk in order to achieve certain goals.
