DentalReach is a professional site and forum for dentists.

DentalReach is one of the fastest growing online communities for dentists, where you can talk dentistry. It's a place to be visible as a dental practitioner and get liked and lauded by fellow professionals.

While the rest of the world can openly share their stories, experiences, and challenges, ethics restrain dentists to converse in an open-to-all world. DentalReach is a gated community of dentists where you can converse freely. It gives you a great opportunity to connect with peers in your locality, region, country, and specialty base. It's a place where you can voice your opinion as a dental professional, within your circle of specialty and outside.

It’s a podium for visibility and networking as a dental professional. Happy connecting!

While most professions are struggling with equality, pay parity and workplace harassment of women, dentistry seems to be quite an equal playground for women. All colleges have female staff in every department, and a huge number of women take a lead and set up their own private dental practice.

Women are definitely painting a pretty picture of dentistry!
